MEMORANDUM FOR: OBGI Historical Officer

SUBJECT : Review of OBGI History Titled "Automation in Cartography"

1. The Historical Staff has reviewed and approved the OBGI history entitled "Automation in Cartography" by

25X1A [redacted] The paper covers the development of several techniques for the application of computer services to the work [redacted] both in the making of 25X1 maps and in the handling of records.

2. This paper was reviewed in detail by the DDS Historical Officer, [redacted] whose comments 25X1A have been penciled directly on the text. It has also been reviewed by the DDI Historical Officer.

3. In addition to the changes proposed on the manuscript, the Historical Staff has a few additional suggestions.

a) Inclusive dates for the period covered by the history should be included in the title.

b) Because the glossaries of abbreviations and terms are virtually essential to any non-expert reader, attention should be drawn to their existence in the introduction or at an appropriate place early in the text.

c) Remaining inconsistencies in the order in which office designators are given should be eliminated. The model should be that used in Appendix B, subordinate unit first, office last.

Approved For Release 2003/03/28 : CIA-RDP80T01497R000100080037-3

4. The Source References and the Figures, together with lists of the same, are missing. The author should supply these as soon as possible. Four complete sets of Figures will be needed for publication.

5. After the author has made the corrections suggested by the reviewers and added the missing material, OBGI can proceed with the final typing of this history. For guidance on format, the Historical Staff's Style Manual should be consulted. When the paper has been typed and proofed, it should be returned to the Historical Staff for further processing.

25X1A

DDI Historical Officer
